

# Community Awareness, Engagement and Advocacy

## Competency

Educator deepens involvement in community issues.

## Key Method

The educator uses the Learn-Design-Do-Reflect cycle to examine the role they have as a member of a community. The educator develops this role to bring together community members and stakeholders with the goal of addressing the predetermined needs and priorities of the community.

## Method Components

Instruction is perhaps one of the most basic building blocks of teacher leadership. Leadership in instructional practice means something more than being the best possible teacher within the four walls of one classroom—it means reaching out and sharing great teaching with others, including fellow educators and a broad range of stakeholders. Successful teacher leaders do not keep their effective practices to themselves; they share that knowledge with others in order to benefit all students.

*In this study commissioned by the Wallace Foundation, researchers from the University of Toronto and University of Minnesota concluded that collective leadership has a stronger influence on student achievement than individual leadership—and higher-performing schools award greater influence to teacher teams, parents, and students. Furthermore, the study found that principals and district leaders do not lose influence as others gain influence.*
