

Policy Implementation

Competency

Educator deepens their understanding of how their strengths in teacher leadership impact the policy-making process.

Key Method

The educator uses the Learn-Design-Do-Reflect cycle to conduct a needs assessment and engage stakeholders in a policy implementation meeting or activity. The educator deepens their understanding of the policy implementation process and how their own biases, experiences of privilege, and personal values impact this competency.

Method Components

Smart education policy should be shaped and guided by what accomplished teachers know about teaching and learning. Too often, individuals with little to no classroom experience are in charge of making policy decisions. Teacher leaders are willing to step up and step out of their classrooms to serve in school, district, state, or national policy leadership capacities to help to shape and, eventually, implement the policies that support student learning.

Policy Competencies for Teacher Leaders
